

## **Bug Tracker:**

Bug	Where?	Added By	Notes to Others	Fixed ?
bloodtype is not getting updated when adding or updating a profile	<ul style="list-style-type: none"><li>- Add Patient with Medical Profile</li><li>- Modify/ Append Patient Info</li></ul>	Moran	<p>Anthony, Jeff - Please check it on your end, I already checked my JSON request and it's fine.</p> <p>[2012-Nov-26 Jeff] Bloodtype is something that should not change for a patient. Doctor can add bloodtype but should not be able to change. Admin can do anything. Try doing it as admin?</p> <p>[2012-Dec-5 Moran] Anthony fixed it on his end. Actually doctor can also change the blood-type. I don't think it's bad though. At any case, now it is fixed.</p>	Yes
"Modifies" a name for a profile which doesn't exist	Modify Patient Name	Moran	<p>Jeff - your JSON response field "modified" returns 1 when it should return 0</p> <p>[2012-Nov-26 Jeff] Refmon is returning that 1 to backend. I defer to Anthony, otherwise I'll check it.</p>	No

“Modifies/Appends” info for a profile which doesn’t exist	Modify/Append Patient Info	Moran	<p>Jeff - your JSON response field “updated” field returns 1 when it should return 0</p> <p>[2012-Nov-26 Jeff] Refmon is returning that 1 to backend. I'll check logic in refmon.</p>	No
JSON Encryption	All API Functions	Moran, Jeff	<p>Need to find a way to install mcrypt VM</p> <p>[2012-Dec-5 Moran] Last problem was in json_decode, added a fix and now it works!</p>	Yes

\* If a bug is removed, please update the cell *Fixed?*.
