Bug Tracker:

Bug	Where?	Added By	Notes to Others	Fixed?
bloodtype is not getting updated when adding or updating a profile	- Add Patient with Medical Profile - Modify/Append Patient Info	Moran	Anthony, Jeff - Please check it on your end, I already checked my JSON request and it's fine. [2012-Nov-26 Jeff] Bloodtype is something that should not change for a patient. Doctor can add bloodtype but should not be able to change. Admin can do anything. Try doing it as admin?	No
"Modifies" a name for a profile which doesn't exist	Modify Patient Name	Moran	Jeff - your JSON response field "modified" returns 1 when it should return 0 [2012-Nov-26 Jeff] Refmon is returning that 1 to backend. I defer to Anthony, otherwise I"ll check it.	No
"Modifies/Appends" info for a profile which doesn't exist	Modify/Append Patient Info	Moran	Jeff - your JSON response field "updated" field returns 1 when it should return 0 [2012-Nov-26 Jeff] Refmon is returning that 1 to backend. I'll check logic in refmon.	No
JSON Encryption	All API Functions	Moran, Jeff	Need to find a way to install mcrypt VM	No
